

# Charlie Schaub

Charlie Schaub is responsible for the National Security Space Business at ARKA, where he oversees developmental, small rate production, large optical systems and support contracts. He also manages all optical manufacturing and optical testing activities.

Previously, Schaub served for 32 years at Danbury Mission Technologies, which became part of ARKA Group in 2022. During his tenure he captured and managed large development programs, including the P912 program, which, for over a decade, was the largest and most complex optical program within the company's portfolio. Earlier, he was product area director for precision optics and oversaw high-quality lithographic optics and unique optics. Before joining Danbury Mission Technologies, he worked for Hughes Aircraft's Electro-Optical and Data Systems Group.

Schaub earned a bachelor's and master's degree at the University of Rochester.
