

# Eric Stuckey

Eric Stuckey leads all operations and production for ARKA. In this role, Eric drives execution across ARKA's enterprise, leading the company to deliver value for our customers.

Previously, Eric served 17 years in the Central Intelligence Agency (CIA), most recently as chief of science & technology for the Weapons & Counterproliferation Mission Center. Previous roles included deputy director of Advanced Systems and Technology at the National Reconnaissance Office (NRO), director of the Integrated Intelligence Office at NRO and division chief in the Office of Special Activities. In 2021, he received the Presidential Rank Award for an exceptional record in achieving major program goals and exceeding customer expectations.

Prior to joining the CIA, he worked in the commercial space industry at companies including Orbital Sciences and Fairchild Space and Defense.

Eric has a Bachelor of Science degree in electrical engineering from West Virginia University.
