

Marc Verity

Marc Verity leads our Advanced Communications and Mission Applications business unit.

He has more than 25 years of experience in cellular and satellite communications. Previously, he served as general manager of AMERGINT Technologies, which became part of ARKA Group in 2019. Under his leadership, AMERGINT secured mission-critical partnerships with dozens of national programs and expanded its line of innovative solutions to address the full spectrum of signal, network and data processing.

Prior to joining AMERGINT, Marc held key roles at several leading technology companies, including Intel Corporation and Broadcom Limited. He spent 13 years with Broadcom, where he led the design, development and testing of 2G/3G/4G cellular reference platforms.

Marc holds a degree in electrical engineering from the University of Colorado at Colorado Springs.
